

# FUNCTIONAL SPECIFICATION DOCUMENT (FSD)

**Project Title:** Calculating Family Expenses Using ServiceNow

## 1. Introduction

This document describes the functional specifications of the Calculating Family Expenses Using ServiceNow project.

## 2. Purpose

To define the system features and workflows for tracking and managing family expenses.

## 3. System Overview

The system allows users to record daily expenses, categorize them, calculate totals, and generate reports.

## 4. User Roles

Family members record expenses and view reports. Administrator manages system configuration.

## 5. Functional Requirements

Users can add expenses, categorize them, calculate totals, and generate monthly reports.

## 6. Non-Functional Requirements

The system should be reliable, user-friendly, and secure.

## 7. Constraints

Depends on ServiceNow platform availability and internet connectivity.

## 8. Assumptions

Users have basic knowledge of using ServiceNow.

## 9. Conclusion

The system fulfills all functional requirements for managing family expenses.
