

FINAL PROJECT REPORT

Project Title: Calculating Family Expenses Using ServiceNow

Abstract

This project focuses on calculating and managing family expenses efficiently using the ServiceNow platform.

Objectives

To automate expense tracking, reduce manual calculations, and improve financial planning.

Technology Used

ServiceNow platform with forms, tables, and business rules.

Implementation

The system is implemented using ServiceNow tables for data storage, forms for user input, and business rules for calculations.

Testing

The system was tested using functional testing, performance testing, and user acceptance testing.

Conclusion

The project successfully achieves its objectives and provides an effective solution for managing family expenses.
